

**RULES  
OF  
TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION  
WATER QUALITY CONTROL BOARD  
DIVISION OF WATER POLLUTION  
CONTROL**

**CHAPTER 1200-5-2  
PUBLIC SEWERAGE SYSTEMS**

**TABLE OF CONTENTS**

1200-5-2-.01	Definition of Terms	1200-5-2-.04	Interconnections or other Connections with Potable Water Supply
1200-5-2-.02	Supervision over Construction of Public Sewerage Systems	1200-5-2-.05	Investigations, Reports, and, Recommendations Standards and Orders
1200-5-2-.03	Supervision over Operation of Public Sewerage Systems		

**1200-5-2-.01 DEFINITION OF TERMS.**

- (1) Public Sewerage System. The conduits, sewers, and all devices and appurtenances by means of which sewage is collected, pumped, treated and disposed of finally. This shall include systems owned by municipalities, utility districts, those corporately owned, state owned, and all others serving the public, including industrial wastes discharged into public systems.
- (2) Sewage. All water carried wastes from residences, buildings, institutions, or industrial establishments that are connected to a public sewerage system, together with such ground, surface, or storm water as may be present.
- (3) Department. The Tennessee Department of Public Health through its executive officer, the Commissioner of Public Health, or his designated representative.
- (4) Person. Any and all persons, natural or artificial, including any individual, firm or association, and any municipal or private corporation organized or existing under the laws of this or any other state or country.

**Authority:** T.C.A. §§53-2002 and 53-2603. **Administrative History:** Original rule filed June 7, 1974.

**1200-5-2-.02 SUPERVISION OVER CONSTRUCTION OF PUBLIC SEWERAGE SYSTEMS.**

- (1) Preliminary Informations. Whenever any new construction or any change of an existing system is contemplated, a statement concerning the proposed construction or change together with such preliminary plans, reports, operating cost data, construction cost estimates, and any other necessary data shall be submitted to the Tennessee Department of Public Health. These data will be reviewed by the Department to determine if sufficient information has been provided for review of the project and if the proposed project meets the Department's general design standards of if additional changes will be necessary prior to preparation of the final plans and specifications. The Department's approval should be obtained in writing prior to preparation of the final plans and specifications.
- (2) Sewage Samples. Whenever any new construction or changes of an existing system involving the treatment works is contemplated representative samples of the sewage shall be properly collected and analyses are directed by the Department. These data and any other pertinent information shall be submitted to the Department.
- (3) Final Plans. Before work is commenced on any new construction or change of an existing system, final plans and specifications and cost estimates, together with such additional data as may be necessary to determine the suitability of the works, shall be submitted to the Tennessee Department of

(Rule 1200-5-2-.02, continued)

Public Health, and no part of the work shall be started until the Department has given its written approval. All such plans should be submitted at least 30 days prior to the date upon which action of the Department is desired. After construction has been completed, a set of "As Built" plans shall be submitted to the Department.

- (4) **Revision of Plans.** All changes in the plans and specifications requested by the Department must be made and approved by the Department prior to construction. In case it is necessary or desirable to make any additional changes in the approved plans and specifications, revised plans and specifications, together with a statement of the reasons for the changes, shall be submitted to the Tennessee Department of Public Health for review and no part of the work affected by the change shall be started until the Department has given its approval in writing.
- (5) **Work in Conformity with Plans and Specifications.** A copy of the approved plans and specifications shall be available at the job site at all times during construction. All work on new construction or changes of existing systems shall be done in conformity with the approved plans and specifications. The consulting or design engineer shall provide adequate inspection during construction to ascertain that all work is done in accordance with the approved plans and specifications.

The Department's representative shall have access to the project at all times during construction. If the Department's representative observes work being done in a manner that does not conform to the approved plans and specifications, a request will be made through the engineer's representative or directly to the contractor to cease all work until the nonconformity with the approved plans and specifications has been rectified.

- (6) **Records of Existing Works.** Whenever there is any question concerning the suitability of existing structures, equipment or other parts of the sewerage system to perform the function for which intended, the Department may require the submission of plans or other data necessary to ascertain the details of such works in relation to their possible direct or indirect effect upon public health.
- (7) **Sewer Use Ordinance.** The governing body of each public sewerage system shall enact an ordinance that will state: (a) the type materials, construction, and inspection of service lines connecting to the public sewer, (b) the limits of the physical and chemical characteristics of the sewage that will be discharged to the system by the users, (c) and any surcharges that will be assessed when the limits of the physical and/or chemical characteristics are violated. A copy of the proposed ordinance must be submitted to and approved by the Department. Such ordinance must be on file with the Department prior to the placing into operation the sewerage facilities.
- (8) **Ownership and Operational Organization.** Prior to the approval of final plans and specifications for sewerage facilities that are not owned and operated by a municipality or public utility district, the Department must receive evidence of the ownership of the system by a satisfactory organization that will be responsible for the operation and maintenance (such organization as a corporation set up under the General Corporation Act of 1969, an organization that has a charter from the Tennessee Public Service Commission, or a title deed on FHA insured loans) of the system.
- (9) **Other Utilities.** No other utility lines or systems are to be placed in the same trench as sewer lines, and potable water lines should be placed a minimum horizontal distance of ten (10) feet from the sewer lines.

**Authority:** T.C.A. §§53-2002 and 53-2003. **Administrative History:** Original rule filed June 7, 1974.

### **1200-5-2-.03 SUPERVISION OVER OPERATION OF PUBLIC SEWERAGE SYSTEMS.**

- (1) **Records and Reports.** Daily records of the operation and maintenance of sewerage facilities, data on laboratory analyses of samples collected in accordance with the sampling program provided by the

(Rule 1200-5-2-.03, continued)

Department, and any other pertinent information shall be submitted to the Tennessee Department of Public Health on forms supplied by the Department. Reports may be required weekly, monthly, or as deemed necessary to ascertain the continuous satisfactory operation of the facilities.

- (2) Samples. Such samples of sewage or water from the receiving stream shall be submitted to the Tennessee Department of Public Health when and in such manner as may be directed from time to time.
- (3) Supervision and Operation. The supervision, operation, and maintenance of sewerage systems shall be of such character as in the opinion of the Tennessee Department of Public Health will produce satisfactory results as judged by current standards of the Department. Evidence of competency may be required if and when deemed necessary by the Commissioner to insure proper operation and maintenance of any public sewerage system.
- (4) Bypassing. There shall not be discharged any untreated sewage or inadequately treated wastes to a ditch, stream or lake except in cases where an absolute necessity exists for a short duration and the consent of the Tennessee Department of Public Health has been received in writing prior to the time of discharge.

**Authority:** T.C.A. §§53-2002 and 53-2003. **Administrative History:** Original rule filed June 7, 1974.

#### **1200-5-2-.04 INTERCONNECTIONS OR OTHER CONNECTIONS WITH POTABLE WATER SUPPLY.**

Interconnections. No person shall install, permit to be installed or maintain an interconnection or other connection between any part of the sewerage system or any appurtenance and a potable water supply or a public water supply in such manner that sewage or waste may find its way into or otherwise contaminate any potable or public water supply.

**Authority:** T.C.A. §§53-2.002 and 53-2003. **Administrative History:** Original rule filed June 7, 1974.

#### **1200-5-2-.05 INVESTIGATIONS, REPORTS, AND RECOMMENDATIONS, STANDARDS, AND ORDERS.**

- (1) Investigations. The Department will make such routine or special investigations as may be considered necessary to insure proper construction, operation and maintenance of public sewerage systems and to insure compliance with these regulations. The owners or operators of public sewerage systems shall arrange to assist the Health Department in making such investigations and otherwise cooperate by furnishing any pertinent data. When the Department makes written recommendations concerning the sewerage facilities, the recommendations should be followed when at all possible.
- (2) Reports and Recommendations. Reports of investigations, together with recommendations regarding needed improvements or other matters relating to any public sewerage system, shall be prepared and forwarded to the official responsible for such system as often as deemed necessary by the Director of the Division.
- (3) Standards. The Department shall prepare and disseminate such information concerning public sewerage systems as it may deem necessary or desirable to insure the proper collection and disposal of sewage. It shall prepare, adopt, or utilize such standards as necessary to evaluate results of sewage disposal through any public sewerage system in Tennessee.
- (4) Special Orders. Whenever it is the judgment of the Tennessee Department of Public Health, based upon investigations, that a public sewerage system is an actual or potential menace to public health, because of faulty design, inadequacy, improper supervision, or inefficient operation, and that effective measures are not being carried out to correct these defects, the Department may issue an order for their

(Rule 1200-5-2-.05, continued)

correction, and such order or orders shall be complied with within the time limit specified in the order.

- (5) Enforcement by Department. Whenever in the judgment of the Tennessee Department of Public Health any standards, policies, general or special orders, rules, or regulations issued by it to control public sewerage systems are violated, an authorized representative of the Department may cause to be issued a warrant in the appropriate court for the violation.

**Authority:** T.C.A. §§53-2002 and 53-2003. **Administrative History.** Original rule filed June 7, 1974.
